

Get started with the tracker

A skill you build a little every day. Follow your path, tick off tasks, and watch yourself level up.

HOW TO USE THE TRACKER

- 1 **Open the tracker:** mykhailo-melnyk.github.io/ae-tracker/tracker.html
- 2 **Sign in with GitHub** — one click. That's your account.
- 3 **Pick your path** — Web, Mobile, or Backend — so tasks match your work.
- 4 **Start Level 1** — open the first task and go.
- 5 **Check the box** when you finish a task — it saves right away, and it's yours.
- 6 **Found a problem or have an idea?** Use the [Report / suggest link](#) — it comes straight to us.

Build the habit

Use AI on your real work, a little, every day. 15 minutes a day beats one long day a month.

- Ask AI to explain a file you already know
- Take one unclear prompt and make it clear
- Read one change before you accept it

THE FIVE LEVELS

- L1 **Understand** — read, not write
- L2 **Edit with Review** — the goal for most of us
- L3 **Plan & Implement** — plan before big changes
- L4 **Orchestrate** — tools for the whole team
- L5 **Architecture Partner** — question your own ideas

CURRICULUM KNOWLEDGE BASE

github.com/solvdinc/agentik-engineering

GETTING ACCESS TO THE KNOWLEDGE BASE

No access to github.com/solvdinc/agentik-engineering yet? Request it:

- 1 Create a ticket in the Solvd service desk:
solvd.atlassian.net/servicedesk/customer/portal/1/group/11/create/52
- 2 Paste this description, filling in your own name and GitHub username:

TICKET DESCRIPTION — REPLACE THE HIGHLIGHTED PARTS WITH YOUR OWN

github username: **<your-github-username>**

1. Add **<Your Full Name>** to Solvd org in GitHub.
2. Add read and write permission to this repo: <https://github.com/solvdinc/agentik-engineering/tree/main>

Level 2 is the goal for most engineers.

Mykhailo Melnyk — Head of Web Competency · Jakie Himel — AI Strategy & Transformation Consultant
